SURFACE DECOR

ESSENCE
2027-28

CRAFTED ELEGANCE ALIGNED TO THE NATURE

Step into the world of Essence, an elite, avant-garde portfolio of premium High-Pressure Laminates (HPL) by Finetouch, meticulously curated for prestigious modern spaces. Designed to cater visionary interior designers and architects, this global collection channels international design luxury through a sophisticated harmony of rich hues, striking figures, and exquisite surface textures.

Each surface is crafted using multi-layered high-pressure technology, ensuring exceptional resistance to scratches, impacts, and wear. From the sleek, fingerprint-resistant mattes used in modern minimalist kitchens to the opulent, light-catching textures of our commercial wall cladding, It provides the ultimate canvas for global design.

By seamlessly fusing peerless, master-crafted durability with high-end global aesthetics, we elevate ordinary interiors into breathtaking architectural masterpieces.

LET'S GET ACQUAINTED

The FineTouch curated a journey through the world's most sophisticated decor and surface textures. Born from a vision to redefine interior landscapes, We serves as a bridge between avant-garde European design and global durability standards. This collection is more than a portfolio of laminates; it is a sensory exploration designed for architects and visionaries who refuse to compromise between the raw beauty of nature and the precision of modern engineering.

Beyond aesthetics, each surface is crafted using multi-layered high-pressure technology, ensuring exceptional resistance to scratches, impacts, and environmental wear. From the sleek, fingerprint-resistant mattes used in modern minimalist kitchens to the opulent, light-catching textures of our commercial wall cladding, It provides the ultimate canvas for global design.

HPL LAMINATES

High-Pressure Laminate is the definitive standard for high-performance surfacing, engineered to withstand the rigors of daily life without sacrificing aesthetic elegance. Composed of multiple layers of kraft paper infused with thermosetting resins and cured under intense heat and pressure, HPL is a remarkably dense and resilient material.

It is inherently resistant to scratches, impact, heat, and moisture, making it the ideal solution for high-traffic environments.

IT'S MADE UP OF

discovered for you.

Fine Surface Trading is a premium purveyor of advanced surface solutions, dedicated to bridging the gap between innovative products and high-end interior design. We are established as a trusted partner for architects, interior designers, and furniture manufacturers seeking materials that combine aesthetic luxury with industrial-grade performance. Our portfolio is anchored by a commitment to quality, sustainability, and responsible certifications.

Driven by a passion for detail and a customer-centric approach, Fine Surface Trading continues to push the boundaries of surface decoration. We take pride in offering versatile solutions that withstand the demands of real-life living while maintaining the sophisticated "fine touch" our brand is known for. We remain focused on shaping the future of interior surfaces today.

OAK

Revered by artisans, and architects throughout history, oak is much more than a raw material—it is a cornerstone of our built environment. From the structural beams of medieval cathedrals to the hulls of historic naval fleets, oak has physically shaped our world, earning its reputation as the king of hardwoods.

CALIDO SERIES

CRAFTED BOOK MATCH LAMINATES

Make a monumental statement with the Calido Series collection. This architectural-grade laminate precisely replicates the rare luxury of mirrored marble and quartz slabs. By flawlessly aligning the dramatic veins and mineral crystalline patterns across adjacent sheets, it creates a breathtaking, symmetrical art piece on your walls. Infuse your grand living rooms, high-end master beds, and luxury wardrobe panels with the timeless, unbroken symmetry of natural stone.

STYLE IT UNIQUE WAY

DEFINE YOUR SIGNATURE PLACES

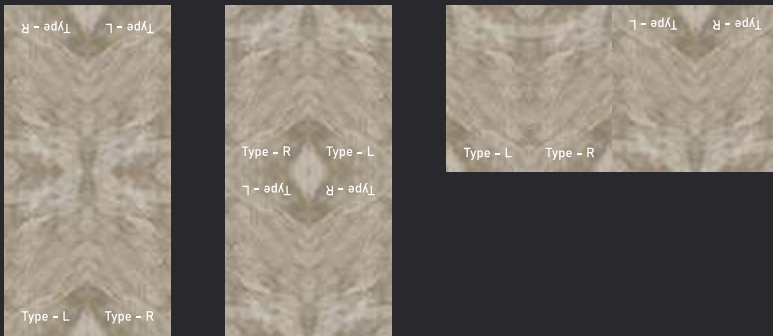

Furthermore, by inverting or alternating the paired sheets on wide wardrobe facades and modular cabinetry, designers can craft a mesmerizing "butterfly-wing" or geometric chevron rhythm, offering the elite visual scale of real quarried stone with zero structural weight.

COMMITMENT TO SUSTAINABILITY
AND CONSISTENT QUALITY

There are 3 key goals driving Finetouch Sustainability Initiatives

Zero waste has focused Finetouch on eliminating unnecessary materials, processes and waste from the product we make and sell.

Zero impact policies has brought about greater focus on recycling to help our environment. Improving the quality of indoor air is vital for human health and Finetouch Laminate exceeds the industry's highest standards for Indoor Air Quality with SCS Indoor Advantage and Greenguard. The Greenguard certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emission of volatile organic compounds (VOCs) into indoor air. This standard includes health based criteria for additional chemicals and also requires lower total VOC emission levels to ensure that product are acceptable for use in more sensitive environments such as schools and healthcare facilities.

Finetouch's commitment to quality and sustainability reflects through these certifications. The brand has received several prestigious certifications, including the Indian Standard Institution and ISO 9001:2008. Finetouch is also a proud member of the Indian Green Build Council, further emphasizing its dedication to sustainable practices. These certifications showcase Finetouch's emphasis on quality, reliability, and eco-friendliness, making it an excellent choice for customers like you who prioritize these values.

ENVIRONMENT FRIENDLY MANUFACTURING PRACTICES

Ensure Emission Free Products for Better In-Door Air Quality

"Emission-free laminates" typically refer to products that have minimal to no harmful emissions during their manufacturing process and throughout their lifecycle. Here's a breakdown of what that might entail. By choosing emission-free laminates, you can contribute to a healthier indoor environment ensuring minimal formaldehyde release. Our laminates that are durable and long-lasting, reducing the need for frequent replacements and minimizing waste in the long run which emphasis sustainable future.

- Quality:** Quality is built into the product during every stage of manufacturing, not just tested into the final product.
- Proper equipment:** Equipment is calibrated regularly to ensure it's fit for purpose
- Cleanliness:** Premises and equipment are kept clean to prevent cross-contamination
- Trained personnel:** Personnel are educated and trained in GMP

PROPERTIES

Wear & Tear Resistant

Finetouch HPL are naturally durable on its own. However, customers may further enhance surface durability, to withstand up to 800 cycles of friction, by adding a special overlay. Currently available in a variety of patterns and colors with multiple finishes.

Heat Resistant

Finetouch HPL can withstand superficial heat for short periods of time without succumbing to any discoloration or damage caused by heat. Despite that, you should always avoid prolonged localized heating for all kinds of **Finetouch HPL**.

Cigarette Burn Resistant

Finetouch HPL can resist damage from burning cigarettes to a great extent. The burnt location will usually only mattify and or slightly discolor if burnt severely. However prolonged local overheating should always be avoided all times, as it can still cause irreversible damage to the surface ultimately.

Light Fastness

Finetouch HPL is less prone to color fading, changing of color or darkening under the influence of sunlight; thus, significantly increasing the lifespan of its vibrancing.

Impact Resistant

Energy is absorbed during impact (by a blunt object), maintaining its beautifully finished look even after receiving force or shock over a quick moment, allowing you to be at ease at all times.

Stain Resistant

Finetouch HPL are made naturally easy to maintain. With this stain resistant property, it doubles up protection and boosts its ability to withstand stains by a few folds, extending its long lifespan.

Easy to Clean

Finetouch HPL are created with care and are easy to clean. Customers can also opt for more hygienic customization such as Anti-Bacterial, which is ideal for hospitals, childcare centers, F&B, etc.

Eco-Friendly (ECO)

Finetouch cares about your health. Thus we strive to reduce toxic chemicals such as Formaldehyde in all of our production. Improvement in the resin formula allows all **Finetouch's** laminates to meet E-0, European formaldehyde emission standards.

MAINTENANCE TIPS

Finetouch HPL are low in maintenance and simple to use. However, even the simplest of products require some maintenance to ensure an optimized living for you.

Like all surfaces, you are advised to clean **Finetouch HPL** regularly, through they usually do not require any special maintenance. Wiping them gently with a damp rag or cloth once in a while usually does the trick. Household cleaning products and disinfectants work perfectly fine as well, as long as they are not abrasive or alkaline.

Always avoid continuous localised heating. We strongly recommend the usage of a kitchen trivet at all times.

Avoid rubbing the surface with highly abrasive materials like metal, nails or sandpaper.

Avoid having chemical solutions like acid, alkaline, and solvents coming in direct contact with **Finetouch HPL** at all times.

Never apply a direct impact to the surface, such as hammering or tossing heavy objects directly at it.

Never use sharp items like knife, meat cutters, penknife, pins etc. to scratch and damage the surface of the laminate.

HANDLING AND STORAGE

The way you handle **Finetouch HPL** can either shorten or preserve its lifespan. Always use the appropriate equipment, and handle each panel with care, especially its decorative side. Only with these proper methods can you live life with **Finetouch HPL** to the fullest.

Storage

Store panels in a dry, clean frost-free room.

Place pallets and panels on a level surface which provides full support.

Keep **Finetouch HPL** in its original packaging whenever possible.

Remove steel straps if **Finetouch HPL** are to be stored for a long time.

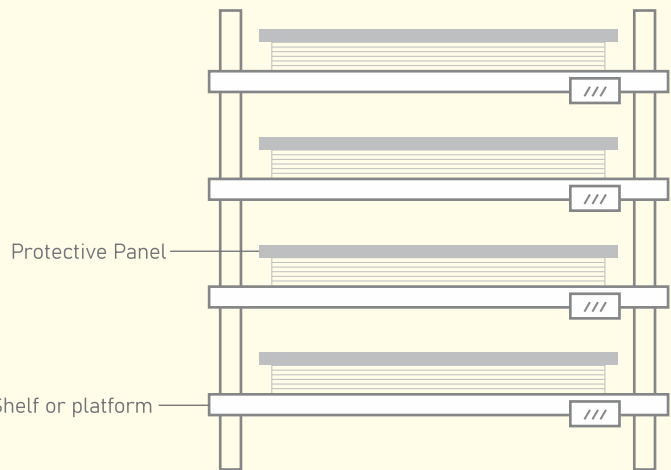

Prevent films of moisture from forming between panels.

Do not place any moisture-sensitive (paper) layers between the panels.

Do leave panels lying flat on top of each other.

Avoiding cavities between the panels, e.g. due to panels having been machined.

The way you handle **Finetouch HPL** can either shorten or preserve its lifespan. Always use the appropriate equipment, and handle each panel with care, especially its decorative side. Only with these proper methods can you live life with **Finetouch HPL** to the fullest.

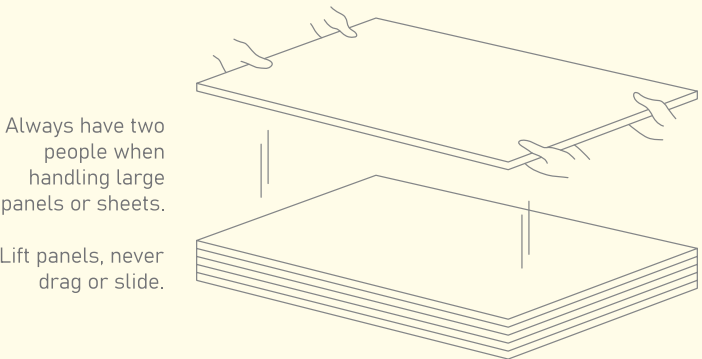

Handling & Transport

Finetouch HPL must always be handled gently to prevent it from breaking or chipping.

When lifting and moving **Finetouch HPL**, never slide or drag panels. Always lift panels and avoid friction, between the surface side with the decor, at all times.

For marking or coding of **Finetouch HPL**, use adhesive stickers and remove it immediately after installations to prevent the occurrence of stubborn residue.

During transportations, secure **Finetouch HPL** with steel straps. Fit protective corner sections under the straps.

PRODUCT SPECIFICATIONS

Finetouch's high pressure laminates (HPL) are characterized by its strength, functional performance, durability, and aesthetic qualities. They are resistant to impact, heat, moisture, wear, scratching, staining and poses good antistatic and hygienic properties. For decorative purposes, they are excellent materials for indoor surfaces (EN 438) in horizontal and vertical applications.

Finetouch laminates are tested according to international standards for resistance for the aforesaid qualities and they are certified to meet IMO (International Maritime Organization) and Fire retardance.

The innovative anti-viral (i.e. COVID-19) laminates lineup are tested in accordance with ISO 21702:2019 (Modified) for SARS CoV-2 and has a very high efficacy to reduce viral loads on the product.

The anti-bacteria line of products are tested for "Antimicrobial Activity" in accordance with JIS Z2801:2010 by accredited labs. Evaluated organisms are Staphylococcus aureus ATCC 6538 Pseudomonas aeruginosa ATCC 9027 and Escherichia coli ATCC 8739.

Finetouch laminates are available in a variety of colors, surface textures and patterns, providing extensive options for architects and designers.
